Professional Profile

Multidisciplinary professional with a passion for web development and technology.
Originally with philology studies, but over time I discovered that my calling was to be a part of the development industry. I am a self-made web developer, using the latest frontend technologies and frameworks, and can collaborate in an office environment working within a team.
I'm a responsible, motivated, hardworking and qualified person, I´m a fast learner and feel happy nurturing a positive working environment.
I´m good at adapting quickly to changes, self-organized and always on time.
I can communicate in different languages, and have experience in multicultural environments, as well as having lived in different countries, which gives me experience working with people from different cultures and backgrounds.

Professional Experience

Webpage Translator – Maven
(London, United Kingdom)

I worked as a contractor performing English to Spanish translations.
My role involved the correct translation of many static web pages, done directly over the HTML, and I had to make sure that the structure and content remained in a proper form.

QA / Tester - Pole to Win
(London, United Kingdom)

Pole to Win is a video game translation and localization company, in charge of different types of projects (small to big). I was a tester for several videogames, particularly developed by Nintendo, for handheld gaming devices.

I oversaw checking the correctness of test cases against a working copy of the games, raised issues, proposed corrections, and exploratory testing.

Apart from the functionality, I had to make sure that the translations were properly done, without grammar faults or incorrect sentences.

I worked in a team environment, closely reporting to my supervisor and sharing knowledge with my teammates.

Education / Studies

Frontend Web Development Course – SOC
2021

Scrum Fundamentals Course – Barcelona Activa
2021

Master´s Degree in Audio-Visual Translation - ISTRAD
2015 – 2017

Master´s Degree in Literary Translation (EN/FR) → ES – Córdoba University

2015

Bachelor's Degree in Hispanic Philology – Málaga University (Spain)
2012

Technical Knowledge
